

COMPENG 2SH4 Project – Statement of Contribution

Your Group Name Margaret and Zahra

Your Name Margaret

Your Team Member's Name Zahra

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.
 - Iteration 1b
 - Iteration 2a
 - Iteration 3

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.
 - Iteration 1a
 - Iteration 2b

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

My first collaborated software development went smoothly. Although there were times when my partner and I could have communicated more on how we coded each iteration for the other person's understanding, we overcame this hurdle by adding more comments and not being afraid to reach out to the other person for help/advice.
