

COMPENG 2SH4 Project – Statement of Contribution

Your Group Number Margaret and Zahra

Your Name Zahra Kazmi

Your Team Member's Name Margaret Bui

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.
 - Iteration 1A
 - Iteration 2B
 - Iteration 3: feature 3
 - ATTEMPTED bonus

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.
 - Iteration 1B
 - Iteration 2A
 - Iteration 3: features 1,2,3
 - Testcases

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

Overall experience was good. Learned how to use GitHub more extensively which is a great asset. Challenges of working in a team can be different coding styles, everyone codes differently so it can take a second to learn and adapt to someone else's style. Though this is a skill and makes for a stronger programmer. It also is tricky to share coding responsibilities when the responsibilities are so intertwined, and again adjusting your own code or their code accordingly.
